## WORK EXPERIENCE

### FULL STACK DEVELOPER

muscat apps Company - Oman                                   2022-Present

During my time at Muscat Apps Company, I worked as a Full Stack Developer, I was involved in both backend and frontend development. On the backend, I used PHP with the Laravel framework to build the server-side components of web applications. This involved designing databases, developing RESTful APIs, and ensuring smooth communication between the frontend and backend.

### BACKEND DEVELOPER

muscat apps Company - Oman                                   2021-2022

responsible for developing backend components of various web applications using PHP via Laravel. my role involved collaborating with the frontend team, product managers, and other stakeholders to ensure seamless integration and efficient functionality of the applications.

### BACKEND DEVELOPER

Freelancer                                                   2019-2021

responsible for developing backend components of various web applications using PHP via Laravel. my role involved collaborating with the frontend team, product managers, and other stakeholders to ensure seamless integration and efficient functionality of the applications.
